Lesson Outline

Speed and Velocity

Α.	What	is	speed?
----	------	----	--------

- _____ is a measure of the distance an object travels per unit 1. of time.
- **2.** Units of speed are units of ______ divided by units of time. The SI unit for speed is ______ per second.
- 3. _____ is the rate of change of position in which the same distance is traveled each second.
- **4.** ________ is speed at a specific instant in time.
- _____ is the total distance traveled divided by the total time 5. ____ it took to go that distance.
- **6.** The equation for average speed is $v = \frac{d}{t}$, where the symbol v stands for average speed, *d* stands for total _____, and *t* stands for total time.

B. Distance-Time Graphs

- **1.** Graphs that compare distance and time are called ______ graphs.
- **2.** Constant speed is shown as a(n) ______ line on a distance-time graph.
- **3.** Distance-time graphs can be used to compare the ______ of two different objects.
- **4.** ______ lines on distance-time graphs indicate faster speeds.
- **5.** Distance-time graphs can be used to ______ the average speed of an object. The difference in ______ between two points is divided by the difference in ______ between the same points.
- 6. When the slope of a line on a distance-time graph decreases, it means that the speed of the object is _____
- **7.** A(n) _____ _____ line on a distance-time graph indicates that the motion has stopped.
- **8.** When the slope of a line on a distance-time graph increases, it means that the speed of the object is _____
- **9.** Even when the speed of an object isn't _____, its average speed can be calculated from a distance-time graph.

Lesson Outline continued

- **C.** Velocity
 - **1.** ________ is the speed and the direction of a moving object.
 - **2.** The velocity of an object can be represented by a(n) ______. The length of the arrow indicates the ______. The arrow points

in the direction of the object's _____.

3. Velocity ______ when the speed of an object changes, when the direction in which the object is moving changes, or when the speed and the direction change.
