$\qquad$ Date $\qquad$ Class $\qquad$

## Content Practice A

## Speed and Velocity

Directions: On each line, write the term from the word bank that correctly completes each sentence. Each term is used only once.

| average | constant | direction | distance | horizontal |
| :--- | :--- | :--- | :--- | :--- |
| instantaneous | steep | time | velocity |  |

1. Speed is a measure of the $\qquad$ an object travels in a unit
of $\qquad$ .
2. When a moving object's change of position is equal in every second, it is moving at $\mathrm{a}(\mathrm{n})$ $\qquad$ speed.
3. An object's speed at any particular moment is its $\qquad$ speed.
4. Its speed for the entire duration that it is in motion from one place to another is its $\qquad$ speed.
5. $\mathrm{A}(\mathrm{n})$ $\qquad$ line on a distance-time graph shows a fast speed.
6. $\mathrm{A}(\mathrm{n})$ $\qquad$ portion on a distance-time graph shows a period of no motion.
7. The $\qquad$ of a moving object includes its speed and $\qquad$ .
